Additional Sub-Funds may, with the prior consent of the Central Bank of Ireland and approval of the Trustee, be added by the Manager.

"A" Listed Units are listed on the Italian Stock Exchange (Borsa Italiana). PGSRF has one class unit listed but it is currently suspended. See Note 18 for further details.

#### **Investment Objectives**

The assets of a Sub-Fund will be invested separately in accordance with the investment objectives and policies of that Sub-Fund, which are set out in a Supplement to the Prospectus.

#### Units

"A" Units are non-distributing Units and, accordingly, the Manager does not intend to make distributions in respect of "A" Units.

"B" Units are distributing Units and, accordingly, the Manager may make distributions in respect of "B" Units.

<sup>&</sup>lt;sup>1</sup> Plurima Global Star Return Fund terminated on 13 September 2017 and relaunched on 23 February 2018. The net asset value for PGSRF was suspended for dealing on 2 November 2018. See Note 18 for further details.

<sup>&</sup>lt;sup>2</sup> Plurima Koine Thematics Fund was launched on 29 March 2022.

<sup>&</sup>lt;sup>3</sup> Plurima TORO Fund suspended on 24 November 2020 and terminated on 31 December 2020. See Note 18 for further details.

#### MANAGER'S REPORT

#### Market Overview H1 2022

Against the backdrop of heightened international political tensions following the invasion of Ukraine by Russia, mounting inflationary pressures partly triggered by the fallout of the invasion, the virtual shutdown of large sections of the Chinese economy following a new outbreak of COVID-19 and continuing supply chain disruptions, world financial markets recorded a near across-board contraction in valuations.

By mid-year Inflation had reached levels (in excess of 8%) unseen since the 1980s and resulted in strong actions by central banks around the world, most notably the Federal Reserve (FED) which enacted three rate hikes and signalled that quantitative easing was coming to a halt. The abrupt change in policy stance and the uncertainty surrounding its effectiveness in bringing down inflation in the short-term without triggering a recession was a major factor behind the rise in interest rates across the maturity spectrum. The US Treasury market experienced one of its worst sell-offs on record. The US 10-year bond yield rose to 2.97% and the two-year yield to 2.93%.

Even the Bank of England (BoE) became hawkish and implemented further rate hikes, bringing the total to five in the current cycle, raising its inflation forecast to 11%. On the back of these statement the UK 10-year yield rose to 2.24% and the 2-year to 1.88%.

In Europe a flash estimate from Eurostat signalled inflation at 8.6% in June, up from 8.1% in May, with energy the biggest contributor to the rise. The European Central Bank (ECB), however, remained far less aggressive partly in response to widening yield spreads following on the announcements that asset purchases would be reduced early in Q3 and rate increases would ensue shortly thereafter. The ECB sought to calm concerns, calling an extraordinary meeting to discuss an "anti-fragmentation" programme likely entailing some form of support for heavily indebted nations. These announcement were not sufficient to quell doubts around the ECB policy stance Against this backdrop mounting political uncertainty sparked a pronounced sell-off in Italian BTPs. The German government 10-year yield increased to 1.37% with Italy's up to 3.39%, hitting as high as 4.27% in June.

The uncertain environment weighed heavily on equity markets. US equities declined sharply in the first 6 months of the year. The S&P 500 fell 21% in the first half, overperforming the NASDAQ which closed the period 30% lower. Technology, communication services and consumer discretionary were amongst the weakest sectors while on the back of the surge in oil and gas prices energy and utility companies were amongst the strongest performers.

In Europe, the French CAC40 was the best performer, falling 17% in the first half, while the German DAX and the Italian FTSEMIB closed the period 20% and 22% lower, respectively.

The Japanese stock market ended the half 8% lower. The yen weakened sharply against the US dollar, breaching the 130 level for the first time in 20 years, falling 18%.

Although Asia ex Japan equities were in part shielded from developments elsewhere they too registered a negative return in the first half of 2022. Investor sentiment turned increasingly downbeat in China amid ongoing supply chain problems partly due to a COVID instigated lockdown and continuing tensions in China/US political and trade relations. The Hang Seng lost 5% over the period while the Shanghai Shenzhen fell 9%.

#### **PORTFOLIO MANAGERS' REPORTS**

#### Plurima Unifortune Global Strategy Fund

| YEAR | Jan    | Feb    | Mar   | Apr    | May    | Jun    | YTD    |
|------|--------|--------|-------|--------|--------|--------|--------|
| 2022 | -0.84% | -1.56% | 0.05% | -0.14% | -0.38% | -3.67% | -6.41% |

Apart from commodities, in H1 2022 financial indices lost as much as -20% in the period. The main driver of this performance were the equity markets with the MSCI World down -21.24, the Nasdaq down -29.51%, the S&P 500 down -20.58%, the Nikkei 225 down - 8.33%, the Eurostoxx50 down -19.85% and the MSCI Europe down -15.49%. On the bond side the Pimco Global Bond was down -12.83% in the period.

Over the past quarter economic data has been weakening and inflationary pressures have started to ease. As the Fed has tightened monetary policy, concerns have shifted from the impact of higher discount rates on valuations to that of a hard economic landing. Meanwhile in China the economy is picking-up as it starts to normalise after 'zero COVID' alongside monetary and fiscal stimulus. For all the credible aspirations of transitioning the economy medium to long-term China only seems to have one effective approach to kick-starting it short-term and this should be supportive of commodity prices.

For many years quantitative easing (QE) has been of incredible benefit to asset owners yet it has created some big financial and social imbalances. The first half of 2022 has seen a major unwinding of some of these distortions; salary earners achieved underlying wage increases not seen for many decades while asset owners suffered significant losses. Whilst negative economic factors are being given more weight by the market at present, there are counter-balancing items that are meaningful and deserve consideration. Labour markets are strong at present. Supply chain issues are improving. The negative hit that asset values have taken should help to bring back some marginal workers, easing supply and helping economic growth.

There seems to be a desire by both America and China to reduce trade tariffs. Banks are well capitalised and nominal loan growth is accelerating in both the US and Europe. Key macro indicators (PMIs) still show western economies growing. Consumers have excess savings from COVID. Whilst consumer sentiment is at record lows, the fear of unemployment is at much more normal levels. A deep recession is being overly discounted by the market. Many of the concerns that the market currently has around higher inflation and higher rates will reduce if economic conditions weaken further and remove the slight bind that central banks find themselves in.

In H1 2022 all strategies delivered negative performance, except Market Neutral, which was positive. For Q1 2022, on a gross basis Equity Long/Short and Convertible delivered heavy negative performances, Directional Equity and Event Driven were negative, whilst Macro provided a slightly negative contribution to the fund.

As mentioned above, Equity Long/Short and Convertible were the worst negative contributors during the first 6 months. Performance was particularly negative in February and June as both months were characterized by deep falls in equity indexes all over the world. Equity Market Neutral was able to adapt to the new equity market scenario and increased volatility context concluding the first six months positive thanks to the good performances of February, March and June. Directional Equity has only a fund investing in Healthcare that was negative in the period although the contribution to the overall performance had a small impact due to its limited exposure. Event Driven investments suffered in May and June but showed a quite favorable trend during the first 4 months. Macro was slightly negative in the period balancing the high volatility in currencies, commodities and Government bonds.

During the period the fund maintained an equity net exposure around 35% and the allocation to the different strategies remained quite steady. The liquidity of the fund remains good and we are not aware of any Corporate Actions that could affect the fund.

Unifortune Investment Management Limited Unifortune Asset Management SGR SpA Date: July 2022

#### Plurima Apuano Flexible Bond Fund

| YEAR | Jan    | Feb    | Mar    | Apr    | May    | Jun    | YTD     |
|------|--------|--------|--------|--------|--------|--------|---------|
| 2022 | -1.26% | -2.22% | -0.54% | -1.88% | -1.92% | -5.33% | -12.52% |

#### **Market commentary**

The first half of 2022 was extremely difficult for investors, with government bond yields moving significantly higher as it became clear that central banks globally were behind the curve in tackling inflation and that base rates would have to be hiked aggressively. In the US, for example, base rates began 2022 at 0-0.25% with the Fed predicting that rates would be at 0.75-1% by the end of the year. As of the last predictions from the Fed in June, rates are now expected to be at 3.25-3.50% by year-end.

As volatility hit markets, investors also had to contend with Russia's invasion of Ukraine. This resulted in widespread sanctions on Russia, further exacerbating high inflation as commodity prices, particularly energy, rallied significantly on fears of Europe being shut out of Russian gas and oil markets. In addition, continued COVID-related shutdowns in China hampered the normalisation of global supply chains, further elevating inflation rates. With fears of a global recession beginning to increase due to the need for central banks to aggressively hike rates, spreads of risk-on assets also widened significantly, compounding the negative rates move and forcing yields significantly higher.

By the end of the period, the US Treasury index had returned -10%, Euro government bonds -11% and the UK Gilt index -14.75%. These moves obviously directly impacted on investment grade indices, with the sterling, dollar and euro IG indices down by around 15%, 14% and 12% respectively. Though high yield indices initially outperformed, the spread widening ultimately meant significant losses for them as well, with the sterling, dollar and euro HY indices down by around 13%, 15% and 15% respectively, while the AT1 index was down 14.6% over the period. Emerging markets indices were down by almost 20%, with Asia high yield losing over 26%.

With negative performance widespread across all asset classes from risk-off rates through to risk-on credit, there were very few places to hide in fixed income; even the short dated 1–5-year maturity US Treasury index lost 4% over the reference period. The period has left investors suffering significant drawdowns, however it also left yields at levels that have rarely been more attractive. The euro HY index, for example, now yields over 7% having been at 2.3% just 10 months ago. With default rates expected to remain low, returns from there could be very attractive.

#### **Fund performance**

The market volatility impacted negatively on most sectors of the Fund, with only the Interest Rate Swap (IRS) delivering a positive performance during the period, contributing 100bp to performance. The IRS was established in November 2021, on the sterling curve, as the portfolio managers had strong conviction that UK rates would have to rise significantly in response to the high inflation being experienced in the UK. The trade performed very strongly as rate hike expectations increased and the team booked profits towards the end of the period.

Government bonds also performed relatively well, detracting 13bp from performance as even the short dated US Treasuries held were negatively impacted in the rates sell-off. As 10-year USTs approached a 3% yield, the managers began to switch away from the short dated bonds to add balance and protection to the Fund as recessionary fears increased.

In the credit sectors performance very much reflected what was seen in the general market, with Euro and US HY declining by 15.8% and 16.7% respectively, while the AT1 sector declined by 14.6% and CLOs by 13.8%. Insurance detracted almost 18% from performance, as this was impacted significantly by both the move in rates (due to its high correlation to government bonds) and the spread widening. It is also a relatively longer dated sector, which further weighed on performance.

The portfolio managers are confident that the bonds held will ultimately recover the poor performance. The negative drawdown reflects broader market moves rather than permanent issues such as defaults or exposure to Russian assets, or any forced selling of assets. The yield on the Fund at the end of the reporting period was 7.4%, which is incredibly attractive for a portfolio with an average rating of BBB- and a relatively short credit spread duration of around three years. In addition to the government bond position of 16%, the Fund also had over 5% in cash at the end of the period, giving the managers flexibility to add to credit or to risk-off positioning when appropriate.

Twenty Four Asset Management Limited

#### Plurima Strategy Portfolio Fund

| YEAR | Jan    | Feb    | Mar   | Apr    | May    | Jun    | YTD     |
|------|--------|--------|-------|--------|--------|--------|---------|
| 2022 | -8.23% | -2.15% | 0.63% | -3.98% | -3.24% | -6.27% | -21.31% |

#### **Market Overview**

Investors began the year in a nervous tone, uneasy about the possibility of the Federal Reserve raising interest rates in order to curb inflation. To make matters worse, Russia waged war with Ukraine in late February; geopolitical tensions thus pushed up commodity and energy prices, further fueling inflationary pressure. 2022 is proving to be the year of restart. For the S&P 500 index, performance for the six-month period was the worst since 1970, the Nasdaq registers losses around 30 percent, Bitcoin has plummeted nearly 60 percent and is folding in disarray. Bond markets fared no better, deflating prices pushed up by negative yields, Treasuries are down 11 percent, Bunds and other Eurozone 10-years lost between 12 and 13 percent.

Widening our gaze, we note that the MSCI Value index (which groups the world's major value stocks) lost -12.5 percent from Jan. The MSCI Growth index (which groups the world's major high-growth stocks) has plummeted -28 percent. Among European sectors, it was a golden semester for Oil/Energy with average gains of +15% and +35% in the US. The period was a disaster for Retail (-35%) drowned out by fears that loss of purchasing power due to high inflation will generate a drop in consumption, and for Tech which fell by 31%.

The U.S. central bank had no choice but to raise Fed rates by a quarter percentage point in March, by 50 basis points at the May meeting, and made an even more aggressive increase of 75 basis points at the June meeting; by virtue of these increases, the federal funds rate is now between 1.5 percent and 1.75 percent.

The ECB Governing Council also made official its intention to raise benchmark interest rates by 25 basis points at its next scheduled meeting in July 2022 and anticipated a further increase at its next meeting in September. In addition, based on the current scenario, the central bank decided to end the asset purchase program (APP) as of July 1, 2022.

Of note, the euro fell below the €1 mark versus the dollar, to a low of \$0.999995 and then back up to \$1.00061. Fear over recession and growing fears over the energy crisis are weighing down the single European currency.

#### **Fund Performance**

In the stock market correction, and bond market correction, of these first six months, the fund has continued with the reduction of growth sectors in favor of more defensive sectors (health care above all) or those linked to rising rates (banking) and infrastructure.

In general, the first part of the year expressed a NAV performance in line with the best-in-class balanced funds.

After a first half of the year that we certainly cannot call quiet, we are entering an important moment marked by many variables that may have reached their highest level. Global growth, inflation, wage pressures, the number of Covid contagions in China, and the aggressive stance of central banks.

The Fund at the end of June was invested at 96% and has this diversification:

The bond asset, bonds' corporate/high yield and emerging funds, stands at 21% overall.

The equity asset, from the U.S., Asia and Europe, is 75%.

Liquidity stands at 4%.

European and Global Advisers LLP Date: July 2022

# **PORTFOLIO MANAGERS' REPORTS (continued)**

# Plurima Global Star Return Fund

The net asset value for Plurima Global Star Return Fund was suspended for dealing on 2 November 2018. There was no activity conducted during the period.

European and Global Advisors LLP

#### Plurima Theorema European Equity Long-Short Fund

| YEAR | Jan    | Feb    | Mar   | Apr    | May    | Jun    | YTD    |
|------|--------|--------|-------|--------|--------|--------|--------|
| 2022 | -4.18% | -1.46% | 0.83% | -2.50% | -1.62% | -1.13% | -9.71% |

#### Market overview

June 2022 marked the end the worst first-half in decades for global equities, as investors grappled with sky-high inflation. In the aftermath of the COVID pandemic's peak, global markets were shaken in February by the Russia-Ukraine situation and its resulting geopolitical tensions, driving further macro – as well as micro- concerns. Adding to the existing supply chain issues and shortages that had been plaguing global markets, China's zero-Covid policy led the country into a two-month lockdown, staging a reopening in June. Stagflation risks and, more recently, the risk of a US recession have led to the Fed's highest rate hike since 1997, with the yield on the benchmark Treasury note up about 150 basis points year-to-date following the biggest selloff in bonds in four decades. Recession and demand destruction risks also looked to be seeping into the commodity market by the end of H1, as the aggregate Bloomberg commodity index fell by -c11.6% driven by a sharp decline in raw materials including copper (-c19%) and iron ore (-c18%). The best performing European sector in 1H22 was Energy (+c12.56%), followed by Telecoms (+c0.04%) and Healthcare (-c6.55%). On the other hand, Retail (-c36.59%) was the worst-performing sector, closely followed by Technology (-c32.41%) and Real Estate (-c31.55%).

#### **Fund performance**

Our portfolio finished the first half of 2022 with a negative performance of -9.71%. The best-performing sector contributing to the half performance was Food, Beverages & Tobacco (+c0.34%); within the sector, Swedish Match (+c.0.50%) stood out as top performer, followed by Thule (+c.0.08%) and Mowi(+c.0.05%). The next best performing sector was Commercial Services (+c0.09%), led by Securitas (+c.0.10%). The two major contributors to the fund's performance were Swedish Match and Faurecia (+c0.22%). Swedish Match's shares jumped in May, as the company agreed to a \$16 billion takeover bid by Philip Morris International, in its push towards generating half of its revenue from smoke-free products. The worst-performing sectors in 1H22 were Technology (-c4.3%) and Media & Telecoms (-c3.08%), with the single major performance detractors being ASML (-c0.84%) and Nordic Semiconductor (-c0.63%). The first half of 2022 was characterised by a largely macroeconomic driven sell-off in tech stocks. Both ASML and Nordic Semiconductor were largely impacted by the pricing in of rising interest rates from central banks as global economies contended with inflation and recession fears, leading to a factor rotation from Growth to Value stocks.

We are disappointed about our first-half performance, despite acknowledging the exceptional macroeconomic challenges the markets have been facing, which have led global stock markets to their worst performance in decades. Though aware of the risks and difficulties ahead, we believe that our portfolio is now much better positioned to take advantage of any opportunities arising in the second half of the year and improve our performance by year-end.

Theorema Advisors UK LLP

#### Plurima 10 Convictions Fund

Overall performance:

| CLASS         | ISIN         | Var% perf |
|---------------|--------------|-----------|
| Retail        | IE00BF13LG55 | -7.47 %   |
| Institutional | IE00BF13LF49 | -7.21 %   |
| Premium       | IE00BMFND205 | -7.39 %   |

Monthly performance (Retail class):

| YEAR | Jan    | Feb   | Mar   | Apr   | May    | Jun    | YTD    |
|------|--------|-------|-------|-------|--------|--------|--------|
| 2022 | -1.95% | 3.19% | 1.11% | 0.11% | -0.08% | -9.59% | -7.47% |

The first half of 2022 was characterized by marked declines in both the equity and bond markets. Concerns about the economic implications of the Russian invasion of Ukraine and the potential need for a faster hike in interest rates to mitigate rising inflation weighed on both stocks and bonds.

The Russia-Ukraine conflict has pushed energy and commodity prices, exacerbating the surge in inflation, disruption of the supply chain and the risk to global growth. The prices of Brent oil and natural gas were very volatile, closing this first part of the year with significant increases. The effects have mainly manifested themselves in Europe, which is structurally more exposed to the import of commodities from Russia and Ukraine.

In China, a new round of Omicron cases weighed on the markets also following the lockdown in the Shanghai area in an attempt by the Chinese government to pursue a zero-contagion policy.

This is now the worst first half of the year in over 50 years. Government bonds were hit as markets moved to price in further significant interest rate hikes on top of what had already been announced. This increase in expectations on the trend in interest rates also contributed to a decline in share prices, also dragged down by concerns about global growth prospects. In detail, equity indices closed the first half of the year with generalized losses: the MSCI World was down 20.28%, the S&P500 19.97% and the Eurostoxx50 17.39%. The US 10 year government yield started the year at 1.50% and closed the period at 3.01% with the same trend showed by the 10 year German government yield which started at -0.18% and closed the first half of the year at 1.34%. The US dollar instead marked a recovery of about 7.80% against the Euro, with the exchange rate standing at 1.0484 at the end of the period.

The fund performance over the period, although negative, was mitigated by the hedging strategy deployed. In terms of sectors Industrial and Healthcare were the best performance contributors during the period along with Materials, specifically Gold. The fund ended the first half of the year with a performance of -7.47% for the retail share class, -7.21% for the institutional share class and -7.39% for the premium share class.

Plurima 10 Convictions Fund **Olympia Wealth Management Limited** Date: July 2022

#### Plurima Mosaico Fund

The Plurima Mosaico Fund registered a 14.98% negative performance in the first half of the year (data for the Institutional Class) with an annualized volatility around 7.5%.

| YEAR | Jan    | Feb    | Mar   | Apr    | May    | Jun    | YTD     |
|------|--------|--------|-------|--------|--------|--------|---------|
| 2022 | -4.49% | -2.90% | 1.37% | -1.20% | -5.43% | -3.21% | -14.98% |

This performance has been achieved in an economic and market environment characterized by the themes of rising inflation, restrictive monetary policies, signs of a slowdown in the various geographical areas, the risk that the ongoing economic slowdown will turn into a recession, as well as the further impacts caused by monetary policy mistakes and the consequences of the war in Ukraine.

The macroeconomic picture has been progressively worsening due to restrictive monetary policies, slowing demand and tensions in the global supply chain. Inflation has been increasing during the entire period and remains high because companies are passing on cost increases in prices. Liquidity in the financial system continued to decline, due to rising yields, the end of 'quantitative easing' and the beginning of 'quantitative tightening'.

The shock caused by the rise and the abrupt end of the bullish trend started in March 2020 in energy and agricultural commodity prices, generated 'stagflation' at global level and slowed down global growth more than expected, particularly in the euro area, a major energy importer.

The Chinese slowdown, emphasised by lockdowns and the continuing crisis in the property sector, has been worrying local authorities and investors. The US economy contracted for the first time in a long time, but the FED maintained a restrictive stance, aware of its responsibilities with inflation reaching 8%. Currencies, driven among other things by monetary policy-induced movements in short-term rates, saw the dollar and Swiss franc strengthen.

In this environment, the first half of the year has been one of the worst half-years for the financial markets in the last fifty years.

The portfolio has been invested in equities, bonds, currencies, and commodities.

Equity exposure moved mainly between 10% and 50%, except for some tactical moves around 60% and below 10%, with a preference for a defensive theme relative to growth and those sectors that tend to be penalised by yield increases. Regional asset allocation was focused mainly on Europe and the US, with no meaningful exposure to emerging and Asian markets.

Commodities have been kept around 20% and represented a relevant component of the asset allocation due to their inflation hedging characteristics. The exposure has been on precious and industrial metals, energy, and agricultural commodities, but at the end of the quarter has been concentrated mainly on gold, when industrial metals have been sold in order to reduce the portfolio cyclicality.

In fixed income we invested mainly in short duration European and US government bonds, Investment Grade floating rate corporate bonds and EM hard currency government bonds. We have kept a negative stance on HY bonds through a structural short position during the first quarter. The net fixed income exposure has been between 5% and 20% and the fund's duration moved between -1 and 1 year.

Currency diversification from the EURO has been mainly on USD, JPY, GBP, CHF and SEK. USD has been the biggest exposure in the period.

The main negative contribution to the performance came from US and European equities, from the Inflation linked bonds and, at the end of the period, from the long exposure to industrial commodities.

#### Plurima New Era Fund

| YEAR | Jan    | Feb    | Mar   | Apr    | May    | Jun    | YTD     |
|------|--------|--------|-------|--------|--------|--------|---------|
| 2022 | -7.76% | -1.79% | 3.13% | -4.83% | -4.84% | -5.52% | -20.06% |

#### **Market Overview**

Investors began the year in a nervous tone, uneasy about the possibility of the Federal Reserve raising interest rates in order to curb inflation. To make matters worse, Russia waged war with Ukraine in late February; geopolitical tensions thus pushed up commodity and energy prices, further fueling inflationary pressure. 2022 is proving to be the year of restart. Several negative records have been broken in these first 6 months of 2022: We will not attempt to list them all. Suffice to say that Wall Street's performance is the worst since 1962, but that is nothing compared to that of the treasuries market, which, according to Deutsche Bank, with its -10.4 percent did the worst since 1788, just before the election of George Washington. The MSCI World index (-21.2%) posted the largest percentage decline in the first half of the year in its history and the worst six-month period since 2008. The U.S. S&P500 index ended the first six months of 2022 with a decline of just over 20 percent and the Nasdaq ended the six-month period with a -29.50 percent.

Persistent inflation has led to an abrupt change in monetary policies in the world's major geographic areas, which have become increasingly tightening and challenging financial markets. The U.S. central bank raised Fed Funds rates by a quarter percentage point in March, by 50 basis points at its May meeting, and made an even more aggressive increase of 75 basis points at its June meeting; by virtue of these increases, the federal funds rate is now between 1.5 percent and 1.75 percent. The ECB Governing Council also made official its intention to raise benchmark interest rates, which it did by 50 basis points, at its meeting in July 2022 and anticipated a further increase at its next meeting in September. Diametrically opposite was the behavior of the PboC, which reduced the borrowing cost of money in May, the most decisive intervention since 2019.

In the stock market correction of recent months, the hardest hit sector has been technology, while the only positive returns have been in the utilities and energy sectors. Bitcoin tumbled nearly 60 percent and folds in disarray.

The euro fell below the 1 euro mark versus the dollar, to a low of \$0.999995 and then back up to \$1.00061. Fear over recession and growing fears over the energy crisis are weighing down the European single currency.

#### **Fund Performance**

The Fund ended the first half of the year with a performance in line with the average of equity funds in the category. As a result of the sharp rise in commodities following the outbreak of the Ukraine War, we decided to consolidate the strong gains on the sector and at the same point supplemented with total return investments and provided for a percentage of cash.

After a first half of the year that we certainly cannot call quiet, we are entering an important moment marked by many variables that may have reached their highest level. Global growth, inflation, wage pressures, the number of Covid contagions in China, and the aggressive stance of central banks.

We expect to invest more in risk assets by the end of the summer if the Fed starts to become less aggressive, as we expect.

At the end of June 85% of the fund was invested, with the remainder held in liquid assets.

<sup>&</sup>lt;sup>1</sup>PUETR - Plurima Unifortune Equity Total Return terminated on 2 November 2015

#### 1. Principal Accounting Policies

The significant accounting policies followed by the Fund are as follows:

#### a) Basis of Accounting

The condensed financial statements for the period ended 30 June 2022 have been prepared in accordance with IAS 34, 'Interim Financial Reporting'.

The principal accounting policies applied in the preparation of these financial statements are consistent with the accounting policies applied in the preparation of the Audited Financial Statements for the year ended 31 December 2021, which were prepared in accordance with International Financial Reporting Standards ("IFRS").

#### 2. Taxation

Under current Irish law and practice, on the basis that the Fund qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, it is not chargeable to Irish tax on its relevant income or relevant gains. However, tax can arise on the happening of a chargeable event in the Fund. A chargeable event includes any distribution or dividend payments to Unitholders, disposals, redemptions, cancellations, encashment or assignment of Units in the Fund. No tax will arise on the Fund in respect of chargeable events in respect of a Unitholder who is neither Irish resident nor Irish ordinarily resident at the time of the chargeable event provided that a relevant declaration in the form authorised by the Irish tax authorities is in place. In the absence of a relevant declaration, there is a presumption that the investor is Irish resident or Irish ordinarily resident.

Dividends, interest and capital gains (if any) which the Fund receive with respect to its investments (other than securities of Irish issuers) may be subject to taxes, including withholding taxes, in the countries in which the issuers of investments are located. Dividends received by the Fund from investment in Irish equities may be subject to Irish dividend withholding tax at the standard rate of corporation tax (currently 12.5%).

However, the Fund can make a declaration to the payer that it is a collective investment undertaking beneficially entitled to the dividends which will entitle the Fund to receive such dividends without deduction of Irish dividend withholding tax.

#### 3. Fees

#### **Management Fees**

Pursuant to the Trust Deed, European and Global Investments Limited have been appointed Manager to the Fund. The Manager is responsible for the general management and administration of the Fund's affairs. The Manager is entitled to receive an annual fee, as set out below, out of that proportion of the Net Asset Value of a Sub-Fund attributable to the relevant Class, accrued daily and payable monthly in arrears at the following rates (plus VAT, if any);

Out of this management fee the Manager will pay the fees of the individual portfolio managers. The Manager is also entitled to receive a performance fee (plus VAT, if any), calculated in accordance with the disclosure below for each Sub-Fund.

The Manager is also entitled to be repaid out of the assets of the relevant Sub-Fund all of its administration and operational expenses. European and Global Investments Limited received a management fee of €1,647,272 (30 June 2021: €1,638,439) for the period of which an amount of €515,025 (31 December 2021: €521,726) was outstanding at the period end.

Where a Sub-Fund invests in one or more Sub-Funds of the same umbrella the investing Sub-Fund may not charge an annual management fee in respect of that portion of its assets invested in other Sub-Funds.

#### **Service Fees**

The Manager shall also be paid out of that proportion of the assets of a Sub-Fund attributable to the relevant Class an annual service/ maintenance fee, as set out below. The service/ maintenance fee will be accrued daily and payable monthly in arrears (plus VAT, if any) except Plurima Unifortune Global Strategy Fund where the manager is not entitled to a service fee. Service fees are included in Other Charges in the Statement of Comprehensive Income.

<sup>&</sup>lt;sup>1</sup> Terminated on 30 May 2022

In each case, of the Increase in the Net Asset Value of the Class (plus VAT, if any), taking subscriptions and redemptions into account, calculated in the following manner:

- 1. At the end of the first Performance Period, the Benchmark is the issue price per Unit in the initial offer.
- 2. If the Net Asset Value per Unit at the end of a Performance Period exceeds the Benchmark, a performance fee is payable. Subject to 1 above, in this case, the Benchmark for a Performance Period is the reported, final Net Asset Value per Unit at the end of the previous Performance Period for which a performance fee was payable.
- 3. If the Net Asset value per Unit at the end of a Performance Period is lower than the Benchmark, no performance fee is payable. In this case, the Benchmark for the next Performance Period is the Benchmark for the previous Performance Period being the previous Performance Period for which a performance fee was payable.
- 4. When a performance fee is payable on Units, it is calculated as the Net Asset Value per Unit less the Benchmark multiplied by the performance fee rate for the relevant Class set out above, multiplied by the average number of Units in issue during the Performance Period. The average number of Units in issue at the end of the Performance Period shall be deemed to include Units which fall to be redeemed and exclude Units which fall to be issued as at the end of the Performance Period.

<sup>&</sup>lt;sup>2</sup>PKTF - Plurima Koine Thematics Fund was launched on 29 March 2022

<sup>&</sup>lt;sup>3</sup>Launched on 29 March 2022

<sup>&</sup>lt;sup>4</sup>Launched on 31 May 2022

#### 3. Fees (continued)

#### Performance Fees (continued)

#### **TYPE B (continued)**

- 5. The performance fee will be calculated and be taken into account in the calculation of the Net Asset Value per Unit on each Valuation Day. The "Benchmark" is the value, on the last Valuation Day of each Performance Period which the Net Asset Value per Unit on the same day must exceed in order for a performance fee to be payable. The performance fee period shall run from the first business day of the Accounting Period to the last Business Day of the Accounting Period (the "Performance Period"). In the case of the first Performance Period following the date hereof, the Performance Period shall commence on 27th November, 2020, or on the first Business Day subsequent to the Initial Offer Period of the relevant Unit Class (whichever is the later) and will end on 31st December, 2021. Thereafter, the first Performance Period (where applicable) will commence on the first Business Day subsequent to the Initial Offer Period and will end on the last Business Day of the Accounting Period. Fees payable to the Manager shall be accrued on each Valuation Day and will crystallise and be payable annually in arrears at the end of each Performance Period.
- 6. If Units are redeemed from the Sub-Fund, then any performance fee accrued in respect of the redeemed Units will crystallise at the time of such redemption and be payable to the Manager at the end of the Performance Period in which the redemption takes place.

The calculation of the performance fee will be verified by the Trustee.

Where a performance fee is payable out of the Sub-Fund it shall be calculated upon the Increase in the Net Asset Value per Unit calculated at the end of the relevant Performance Period. Included in that calculation shall be net realised and unrealised capital gains plus net realised and unrealised capital losses as at the end of the relevant period. As a result, performance fees may be paid on unrealised gains which may subsequently never be realised.

The Manager received a performance fee of €1,013 (30 June 2021: €676,336) for the period of which an amount of €120,247 (31 December 2021: €1,121,318) was outstanding at the period end.

#### Trustee's Fees

Pursuant to the Trust Deed, RBC Investor Services Bank S.A., Dublin Branch acts as Trustee to the Fund. The Trustee shall be entitled to an annual trustee fee not to exceed 0.03% (actual fee 0.025%) of the NAV of the Sub-Fund (plus VAT, if any), accrued daily and payable monthly in arrears, subject to a minimum annual trustee fee of €10,000 in respect of each Sub-Fund.

Trustee's fees for the period amounted to €103,475 (30 June 2021: €90,893) of which an amount of €54,871 (31 December 2021: €48,951) was outstanding at the period end.

The Trustee shall also be entitled to a custody fee, accrued daily and payable monthly in arrears based on the location of the assets under custody (which fee is inclusive of sub-custody fees) and will vary from 0.055% per annum of the value of the assets under custody and €18 per transaction (in certain countries such as the United States or Canada) up to 0.80% per annum of the value of the assets under custody (in certain countries such as Zimbabwe) and up to €300 per transaction (in certain other countries).

#### **Audit Fees**

Audit fees for the period amounted to €58,727 (30 June 2021: €33,378)

#### Administrator's Fees

RBC Investor Services Ireland Limited acts as Administrator to the Fund. The Manager pays to the Administrator out of the assets of the Fund an annual administration fee not to exceed 0.045% of the Net Asset Value of the Fund, accrued daily and payable monthly in arrears (plus VAT, if any), which minimum fee will range from €15,000 to €26,000 per annum in respect of each Sub-Fund.

#### 3. Fees (continued)

#### Administrator's Fees (continued)

Where a Sub-Fund has more than one Portfolio Manager, the Manager pays to the Administrator out of the assets of the Fund an additional minimum fee of €2,000 per annum (plus VAT, if any) in respect of each additional Portfolio Manager in excess of one.

The Administrator shall also be entitled to be reimbursed out of the assets of the Fund for any third party expenses incurred on behalf of the Sub-Fund (plus VAT, if any) including, but not limited to, telephone, fax, cable and communications network, postage expenses, printing and publication costs of reports, circulars and any other documents.

Administrator's fees for the period amounted to €104,580 (30 June 2021: €89,224) of which an amount of €108,432 (31 December 2021: €96,451) was outstanding at the period end.

Pursuant to the Trust Deed, RBC Investor Services Ireland Limited acts as the Transfer Agent to the Fund. The Manager shall pay to the Administrator out of the assets of the Fund a fee of €10,000 per annum in respect of each Sub-Fund (plus VAT, if any). This fee is subject to a maximum of 18 Sub-Funds and 4 classes per Sub-Fund.

Transfer Agent fees for the period amounted to €46,384 (30 June 2021: €39,121) of which an amount of €51,702 (31 December 2021: €45,071) was outstanding at the period end.

#### Research Fees

The Manager has agreed with the respective Portfolio Managers that research costs can paid by the Fund in relation to; Plurima 10 Convictions Fund, Plurima TORO Fund, Plurima Mosaico Fund and Plurima VB Strategy Fund.

During the period to 30 June 2022, the following research costs were paid/reimbursed and are included under other charges/income in the Statement of Comprehensive Income;

Plurima 10 Convictions Fund charged - €2,579 (30 June 2021: €793)

Plurima Mosaico Fund charged - €8,450 (30 June 2021: €11,557)

Plurima TORO Fund charged - €Nil (30 June 2021: €Nil)

Plurima VB Strategy reimbursed (other income) - €Nil (30 June 2021: (other income) €Nil)

#### 4. Related Parties

IAS 24 'Related Party Transactions' requires the disclosure of information relating to material transactions with parties who are deemed to be related to the reporting entity.

The Fund and European Investment Consulting are considered related parties by virtue of Julian Alworth's role as a Director of EGI and his employment by and part ownership of European Investment Consulting, a provider of consulting services to the Fund. Fees charged directly to the Fund for the period amounted to €16,021 (30 June 2021: €15,287).

European and Global Advisers LLP ("EGA LLP") is considered a related party as Julian Alworth is a Director of EGI and partner in EGA LLP. See page 3 for a list of Sub-Funds for which EGA LLP is the portfolio manager.

#### 4. Related Parties (continued)

The below table shows fees paid to EGA LLP for facility fees, research costs and UK tax reporting for the financial period ended 30 June 2022 and 30 June 2021:

| Sub-Fund Name                                    | 30 June 2022 | 30 June 2021 |
|--|--------------|--------------|
| Plurima Theorema European Equity Long-Short Fund | €1,122       | €950         |
| Plurima Mosaico Fund                             | €24,577      | €17,220      |

Fees outstanding to EGA LLP as at 30 June 2022 amounted to €36 (31 December 2021: €2,718).

The Manager administers the security lending scheme on behalf of the participating Sub-Funds, and receives a fee to cover expenses and time incurred in the process. Please see Note 14 for details.

Twenty Four Asset Management Limited is the Portfolio Manager of Plurima Apuano Flexible Bond Fund. This Sub-Fund has investments in the TwentyFour Income Fund Ltd and TwentyFour Select Monthly Income Fund Ltd, funds managed by Twenty Four Asset Management Limited, valued at €4,193,708, 4.37% of the Net Assets of the Sub-Fund (31 December 2021: €5,065,670, 4.54% of the Net Assets of the Sub-Fund). This would be considered a related party transaction by virtue of Portfolio Manager connection.

#### **Connected Persons**

In accordance with the requirements of Regulation 41(1) of the CBI UCITS Regulations, any transaction between the Fund and a Connected Person must be conducted at arm's length and in the best interests of the Unitholders where a "Connected Person" means "the Manager, the Trustee / Depositary, their delegates or sub-delegates and any associated or group company of such parties or their delegates or sub-delegates. The Manager is satisfied that there are arrangements in place (evidenced by written procedures) to ensure that the obligations set out in the CBI UCITS Regulations applied to all transactions with connected parties and that transactions with connected parties entered into during the period complied with the obligations set out in the CBI UCITS Regulations.

#### 5. Efficient Portfolio Management

Where considered appropriate, a Sub-Fund may utilise financial derivative techniques and instruments for efficient portfolio management and/or to protect against foreign exchange risks, subject to the conditions and within the limits laid down by the Central Bank of Ireland. These techniques and instruments include, but are not limited to futures, options, swaps and forward foreign exchange contracts, details of which are disclosed in Note 11. Please see Note 10 for details of cash held as collateral. Details of securities lending are provided in Note 14.

#### 6. Financial Instruments and Associated Risks

The Fund's activities expose it to a variety of financial risks: market risk (including other price risk, interest rate risk and foreign currency risk), credit risk and liquidity risk.

The Fund is also exposed to operational risks such as settlement and custody risk. Custody risk is the risk of loss of financial assets and liabilities held in custody occasioned by the insolvency or negligence of the Trustee. Although an appropriate legal framework is in place that reduces the risk of loss of value of the financial assets and liabilities held by the Trustee, in the event of failure, the ability of the Trustee to transfer the financial assets and liabilities might be impaired.

A full description of the risks the Fund is subject to and how the risks are managed is disclosed within the annual audited financial statements for the year ended 31 December 2021.

#### 7. Fair Value Measurements

IFRS 13, Fair Value Measurement, requires a fair value hierarchy for inputs used in measuring fair value that classify investments according to how observable the inputs are. Observable inputs are those that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's assumptions, made in good faith, about the inputs market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The fair value hierarchy is categorised into three levels based on the inputs as follows:

Level 1 - Valuations based on quoted prices in active markets for identical assets or liabilities (level 1);

Level 2 - Valuations based on quoted prices in markets that are not active or based on inputs other than quoted prices for which all significant inputs are observable, either directly (as prices) or indirectly (derived from prices) (level 2) and;

Level 3 - Valuations based on inputs that are unobservable and significant to the overall fair value measurement (level 3).

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement (lowest being level 3).

Observable inputs are those that market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect Fund management's assumptions, made in good faith, about the inputs market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The determination of what constitutes "observable" requires significant judgment by Fund management. Fund management considers observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to Fund management's perceived risk of that instrument.

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, Fund management's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. Fund management uses prices and inputs that are current as of the measurement date, including periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many securities. This condition could cause a security to be reclassified to a lower level within the fair value hierarchy.

#### **Valuation Techniques**

When fair values of listed equity and debt securities, as well as publicly traded derivatives at the reporting date, are based on quoted market prices or binding dealer price quotations (official closing prices), without any deduction for transaction costs, the instruments are included within level 1 of the hierarchy. When the Fund has assets and liabilities with offsetting market risks, it uses mid-market prices as a basis for establishing fair values for the off-setting risk positions and applies the official closing prices to the net open position as appropriate.

#### 7. Fair Value Measurements (continued)

#### Valuation Techniques (continued)

For all other financial instruments, fair value is determined using valuation techniques. Valuation techniques include net present value techniques, comparison to similar instruments for which market observable prices exist, options pricing models and other relevant valuation models.

The Fund uses widely recognised valuation models for determining fair values of over-the-counter derivatives. For these financial instruments, inputs into models are market observable and are therefore included within level 2.

The fair values of currency exchange contracts (forwards and swaps) are calculated by reference to current exchange rates for contracts with similar maturity and risk profiles.

The fair values of any investments in any open ended collective investment schemes (CIS) are based on the net asset value (market value of the underlying CIS's assets less liabilities / number of shares) calculated by the administrator of the underlying CIS. The net asset value of the underlying CIS is adjusted for any factors that indicate that the net asset value per share, as calculated by the administrator of the underlying CIS, may not be the fair value. Investments in CIS are categorised in level 2, except for any ETF (Exchange Traded Funds), which may be classified as level 1.

For the Fund's assets and liabilities not measured at fair value at 30 June 2022 Cash at Bank and Bank overdraft are classified to level 1 and the remaining Fund's assets and liabilities are classified to level 2.

The following table's presents information about the Fund's assets and liabilities measured at fair value as of 30 June 2022:

#### Plurima Unifortune Global Strategy Fund

There were no transfers between level 1, level 2 and level 3 during the period for the Sub-Funds not disclosed in the above tables.

#### Level 3 securities valuations methodology

For Plurima Apuano Flexible Bond the Level 3 securities were valued by a competent person selected by the Directors and approved for such purpose by the Trustee with care and in good faith in accordance with the Fund's valuation policy. The approach taken to establish the probable realisation value for such assets is to use cost or last traded price.

The competent person for Plurima Apuano Flexible Bond Fund is Twenty Four Asset Management Limited.

For Plurima 10 Convictions Fund, Plurima Strategy Portfolio and Plurima Unifortune Global Strategy Fund the Level 3 investments were valued based on the assessment of the EGI Pricing and Valuation Committee in consultation with the relevant Investment Managers and on the basis of the latest information available on these securities.

#### Plurima Strategy Portfolio and Plurima Unifortune Global Strategy

The Level 3 investments held by Plurima Strategy Portfolio and Plurima Unifortune Global Strategy are side pockets announced by H2O in October 2020 for a number of holdings of illiquid securities held in the H20 Multibonds, Adagio and Allegro funds. These illiquid securities comprised of various bonds issued by companies owned or associated with the Tennor Group, a company controlled by Lars Windhorst a well-known Germany financier. To our knowledge there is no independent third party valuations of these side pockets.

H2O Asset Management has sporadically provided indicative prices for the side pockets. These prices were used as the basis for pricing. At period end, the last indicative price was posted for 29<sup>th</sup> April 2022.

However, over two years have passed since the situation occurred with no productive substantive action or favourable result. The initial plan by H2O with the side pockets mentioned remitting cash on the back of sales of the private placements. No such sales have been reported in the Press.

We have yet to see any recent financial statements so we have no transparency on the portfolio. We would have expected to see semi-annual financial statements from March 2021 and then audited financials from September 2021.

The lack of further valuations after 29.04.2022 is suggestive of difficulties in the liquidation of the illiquid positions and the underlying difficulties of the issuers of the securities. For example, one of the major holdings is a bond issued by La Perla, a luxury lingerie company listed on the Paris stock exchange. The Company had faced very significant losses and its 2020 financial statements explicitly refer to the possibility that it may not be able to meet its financial obligations. Furthermore, It has reported very significant losses in the first six months of 2021 and a very steep increase in net indebtedness.

Informal discussions suggest that other positions in the Side Pocket may be similarly potentially impaired. It is to be noted as well that all the positions in the side pocket are related to the Tennor Group which itself is under significant financial strain.

#### 7. Fair Value Measurements (continued)

#### Valuation Techniques (continued)

The Pricing and Valuation committee continues to assess any new information and consider whether any changes should be made to its valuations of the side pockets. The Committee considers that a 40% write-down of the April prices and the more conservative valuation it had provided for period-end is valid due to (i) continued lack of transparency in respect of the underlying investments – in particular the absence of any audited accounts (ii) the lack of supporting evidence relating to both the December 2021 and April 2022 price updates (iii) the passage of time since the creation of the side pocket (iv) negative news articles during 2021 regarding the possibility of selling the assets in the side pocket. These considerations were also reiterated at the Pricing and Valuation Committee in Quarter 2 and discussed by the Board on 26<sup>th</sup> April 2022. In addition, the Pricing and Valuation Committee has discussed the difficulties faced more generally by H2O following the write-downs of the exposures to Russian bonds and the rubble, and potential implications for the management of the side pockets although the Pricing & Valuation Committee understand that there is zero exposure to Russian bonds and the ruble in the specific H2O side pockets relating to EGI.

The Pricing and Valuation committee has considered all these elements in its assessment of the value of the side pocket to the funds. Accordingly, and prudentially the Pricing and Valuation Committee has applied an ever-higher discount to the indicative valuations provided by H2O at end-April 2022.

The discount at June 2022 stood at 40% of the latest available 29/04/2022 price. For MULTIBONDs the price is 17,220.31 For ADAGIO the price is 2,156.99 For ALLEGRO the price is 19,775.92

#### **Plurima 10 Convictions**

The Bioera SpA 6% 02/12/2021 bond issued amount is EUR 2.1m. At the end of 2021 the bond was being held at a price of 80 on the basis of an agreement with Bioera to repurchase it at this value.

However at maturity date no sale proceeds had been received and instead a press release from Bioera stated that the bondholders agreed to a payment moratorium until July 2022 which was subsequently extended to November 2022. The company has missed a number of coupon payments (but paid at a later date). It is known that Bioera was unable to pay back the bond in December at a discount to par at a price of 80 plus accrued interest. The company is attempting to raise capital to repay the bonds but there have been no updates on this process to date.

The bond is technically in default. In the absence of further information and lack of independent third party pricing, The Pricing and Valuation Committee decided to price this security at zero for the NAV of the 31 December 2021 and to continue with this valuation at 30 June 2022. It is their view, as agreed by the Board, the there is no guarantee of the bond being paid, and the historical information of missed coupon payments, the price discount and the continued moratorium lead to a pessimistic outlook.

#### 8. Foreign Exchange Translation

The exchange rates as at 30 June 2022, which were used to convert assets and liabilities denominated in foreign currencies back to EUR were as follows:

| Currency | 30 June 2022 | 31 December 2021 |
|----------|--------------|------------------|
| AUD      | 1.520323     | 1.564129         |
| CAD      | 1.348578     | 1.436453         |
| CHF      | 1.000862     | 1.036160         |

| USD      | 1.045450     | 1.137200         |
| ZAR      | 17.127013    | 18.149608        |

The exchange rates as at 30 June 2022, which were used to convert assets and liabilities denominated in foreign currencies back to GBP were as follows:

| Currency | 30 June 2022 | 31 December 2021 |
|----------|--------------|------------------|
| FUR      | 1.161653     | 1.191039         |

The exchange rates as at 30 June 2022, which were used to convert assets and liabilities denominated in foreign currencies back to USD were as follows:

| Currency | 30 June 2022 | 31 December 2021 |
|----------|--------------|------------------|
| HKD      | 7.846953     | 7.796298         |

#### 9. Soft Commissions

The Manager and Portfolio Managers may effect transactions with or through the agency of another person with whom the Manager and Portfolio Managers have arrangements under which that party will from time to time provide or procure for the Manager and Portfolio Managers, goods, services or other benefits, such as research and advisory benefits, the nature of which must be such that their provision will assist in the provision of investment services to the Sub-Funds and for which no direct payment is made, but instead the Manager and Portfolio Managers undertake to place business with that party.

The Manager and Portfolio Managers will not retain the benefit of any commission rebate (being repayment of a cash commission made by a broker or dealer to the Manager) paid or payable from any such broker or dealer to the Manager and Portfolio Managers for or on behalf of the Sub-Funds.

There were no soft commissions arrangements affecting any of the Sub-Funds during the period ended 30 June 2022 or during the year ended 31 December 2021.

#### 10. Cash at Bank

As at 30 June 2022 and 31 December 2022, the following are the cash held at bank and cash held as collateral:

| Goldman Sachs International RBC Investor Services Bank S.A.         86,965         104,725         6,461,361         5,155,943           Bank Overdraft RBC Investor Services Bank S.A.         86,965         104,725         7,138,750         6,455,943           Bank Overdraft Goldman Sachs International RBC Investor Services Bank S.A.         8,1688         (1,974)         -         -           Bank S.A. ### 14. Security Lending

The Sub-Funds detailed below provide securities on loan to third parties in exchange for a collateral payment. The gross income amount of securities lending for the period ended 30 June 2022 is €6,792 (30 June 2021: €7,804) and the net amount of securities lending income is €4,075 (30 June 2021: €4,681). Direct costs amounted to €2,717 (30 June 2021: €3,123). There were no indirect costs. The Manager administers the security lending scheme on behalf of the participating Sub-Funds, and receives a fee to cover expenses and time incurred in the process. For 2022 the Manager was paid a fee of €1,831 (30 June 2021: €1,685). The below tables contain the aggregate collateral value of securities on loan with the relevant counterparties as at 30 June 2022:

| Plurima Apuano Flexible Bond Fund                | 30 June 202 |

### 15. Significant Events During the Period

Plurima Koine Thematics Fund was launched as at 29 March 2022.

Announcements of potential and actual sanctions have been made by a number of countries (including the US, UK and EU) following the invasion initiated by Russia against the Ukraine on 24 February 2022.

The situation, together with markedly increased fluctuations in commodity prices and foreign exchange rates, and the risk of significant adverse impact on global economies, has driven a sharp increase in volatility across markets.

The Directors and Investment Managers continue to monitor the evolving situation and its impact on the financial position of the Sub Funds.

There were no other significant events during the period other than those included in note 17 and note 18 respectively.

### 16. Events After The Period End

There were no significant events after the end of the financial period which would require adjustment to or disclosure in the financial statements.

## 17. Valuation of Thema International Fund PLC and Herald LUX – Absolute Return by Plurima Alpha Selection Fund

At a board meeting held on 15 December 2008, the Board of Directors of European and Global Investments Limited (the "Manager"), with the consent of RBC Investor Services Bank S.A., Dublin Branch (the "Trustee"), decided to suspend the calculation of the net asset value and the issue and redemption of units in the Plurima Alpha Selection Fund (the "Sub-Fund") with effect from 16 December 2008, pursuant to its powers under Clause 17.03 (f) of the Trust Deed of the Fund. Clause 17.03 (f) of the Trust Deed provides that the Manager may suspend the calculation of the Net Asset Value and dealing in a Sub-Fund if "any other reason makes it impossible or impracticable to determine the value of a substantial portion of the assets of the Fund". The decision to suspend the Sub-Fund was taken due to the belief of the Manager that two of the underlying funds (both UCITS, one Irish domiciled and one Luxembourg domiciled) in which the Sub-Fund had invested may have been seriously impacted by issues relating to the Madoff scandal. The Irish UCITS in which the Sub-Fund invested is Thema International Fund plc ("Thema"), which itself suspended on or about 17 December 2008. The Luxembourg Fund in which the Sub-Fund invested is Herald (Lux) ("Herald"), which also suspended in a similar fashion. Thema and Herald holdings represented approximately 18.8% of the net assets of the Sub-Fund as at 16 December 2008.

Accordingly, following consultation with the Central Bank of Ireland, the Manager decided that the best solution would be for the Sub-Fund to enter into a scheme of reconstruction which would involve:

i the transfer of the liquid assets of the Sub-Fund to the newly established Plurima Frame Alpha Strategy Fund (the "New Sub-Fund") in consideration for the issue of Units in the New Sub-Fund to Unitholders in the Sub-Fund, and;

ii the illiquid assets of the Sub-Fund, namely the holdings in Thema and Herald, (together with a provision of €150,000 to cover any expenses) remaining in the Sub-Fund (and each Unitholder remaining a Unitholder of the Sub-Fund). These assets are written down as zero on the Sub-Fund Statement of Financial Position.

As disclosed in prior years, settlement of the claim in relation to the Thema Fund was made in 2013 and the distribution was made to Unitholders in December 2013.

On 20 February 2020 the Sub-Fund received a final residual payment for liquidation of €29,892.32 representing the last expected payment from this asset.

On 11 December 2014 Herald (Lux) Liquidators signed a settlement with the Trustee of the Estate of Bernard Madoff. The agreement recognises the customer claim of Herald (Lux). It allows a customer claim of 90% of the net amount invested by Herald (Lux). It is not clear yet what the exact amount will be. In Quarter 4 2015, the Manager received several requests for information from the liquidator of Herald (Lux). EGI provided all requested details and it has been confirmed by the liquidators that they are satisfied that the Sub-Fund has completed all relevant AML and KYC requirements.

On 2 June 2017 the liquidators announced they reached a settlement agreement with the parties involved in the Luxembourg proceedings. The settlement agreement will result in a considerable contribution to the estate in addition to the funds from the Madoff estate.

The settlement agreed in the Luxembourg proceedings were approved by the Court on 30 November 2017. In December 2017 the US Trustee announced he will seek approval from US Bankruptcy Court for the allocation of a distribution on the allowed customer claims. The percentage announced was 3.585%. The liquidators will aim at integrating this amount in the forthcoming distribution payment.

Plurima Alpha Selection Fund received payments of HSBC settlement monies on 18 April 2018 of €164,213. On 2 August 2018 Plurima Alpha Selection Fund received a further payment of \$591,061 from Herald.

The Sub-Fund made onward distributions to unitholders of these monies. The liquidator has confirmed that further payments will be made.

## 17. Valuation of Thema International Fund PLC and Herald LUX – Absolute Return by Plurima Alpha Selection Fund (continued)

As of December 2019, the liquidators were in the process of finalising the sale of the allowed claim held by Herald (Lux) in the BLMIS bankruptcy. However, in March 2020 due to the situation of financial markets the liquidators were notified by the potential buyer of the claim of the break off of the negotiations. The liquidators are now reconsidering all options regarding the next steps to be taken in view of the closing of the liquidation and a final distribution. The liquidators received the 11<sup>th</sup> interim distribution from the BLMIS Trustee in the amount of USD 4.543.290 or 1.975% of the allowed claim.

On 26 May 2021 the liquidators announced that they have entered into an agreement with a New York based company by which Herald (Lux) sold its Final Allowed Customer Claim in the BLMIS estate to that company. The agreement achieves an Increase in recovery of assets for Herald (Lux) in the amount of approximately USD 11,640,024 in addition to the 12th distribution payment received by the US Trustee.

On March 3rd, 2022, the liquidators presented at the Court session of the VI chamber of the Luxembourg District Court a request to be allowed to distribute the total amount of USD 32,610,552 as second and final distribution payment to the shareholders of Herald (Lux). This second distribution will result in the payment of the amount of USD 164.65 / share which comes in addition to the amount of USD 874.96 / share paid in 2018 to the shareholders. This second distribution payments will bring the total recovery ratio per share to 83.22%.

By judgement dated March 17th, 2022, the Luxembourg District Court approved the liquidators' request to proceed with the second and final distribution payment to the shareholders of Herald (Lux). The liquidators will now execute this judgement and make distributions to the shareholders.

#### 18. Plurima Global Star Return Fund and Plurima TORO Fund

With effect from 2 November 2018 the Manager decided in line with the procedure laid out in the Prospectus to suspend the calculation of the net asset value and the issue and redemption of units in the Plurima Global Star Return Sub-Fund pursuant to its powers under Clause 17.03 (e) of the Trust Deed of the Fund.

On 1 February 2022 the Directors of the Manager formally made the decision that it was no longer practical or viable to continue to operate the Sub-Fund. The Directors of the Manager believed that it was in in the best interests of the unitholders of the Sub-Fund to terminate the Sub-Fund. This was communicated to the unitholders on 25 February 2022.

Accordingly, pursuant to Clause 37.03 of the Trust Deed of the Fund, the Manager decided to terminate the Sub-Fund on 31 March, 2022. Due to the suspension the sub-fund was not actively managed during the period.

With effect from 24 November 2020 the Manager decided in line with the procedure laid out in the Prospectus to suspend the calculation of the net asset value and the issue and redemption of units in the Plurima TORO Sub-Fund pursuant to its powers under Clause 17.03 (e) of the Trust Deed of the Fund. The TORO Sub-Fund was consequently terminated as at 31 December 2020 and all shareholders were redeemed at this point.

The Toro Funds holds only a Lekta Therapy Limited bond. The bond was paying its coupons although it was deemed illiquid. However the coupon due in June 2022 was not paid. At a bondholder meeting on 8th July 2022 a conversion of the LEKTA bond into equity shares in the company was proposed. This was passed by a qualified majority of the bondholders. The recent coupon is expected to be rolled into the equity conversion. The full details and timeline of the conversion are still to be confirmed. Equity shares of LEKTA Therapy Ltd. have been listed on the Vienna stock exchange since early 2022 but liquidity is limited. The Manager is continuing in their efforts to identify potential buyers.

### 19. Material Changes to Prospectus

There were no material changes to the prospectus during the period ended.

### 2. Sustainable Finance Disclosure Regulation and Taxonomy Disclosure

### **Article 6 Funds:**

Plurima Unifortune Global Strategy Plurima Theorema European Equity Plurima 10 Convictions Fund

The sub funds deemed Article 6 under Sustainable Finance Disclosure Regulation ("SFDR") integrate sustainability risk in their investment decisions, but do not promote any specific environmental or social characteristics as part of their investment strategy.

The investments underlying these sub funds do not take into account the EU criteria for environmentally sustainable economic activities.

### Appendix (continued)

### 2. Sustainable Finance Disclosure Regulation and Taxonomy Disclosure (continued)

#### **Article 8 Funds:**

Plurima New Era Fund Plurima Strategy Portfolio Fund Plurima Mosaico Fund Plurima Apuano Flexible Bond Plurima Koine Thematics Fund

The prospectus supplements of the sub funds below were updated to reflect their ESG approach with an effective date of 31st December 2021. The substance of these changes is presented below.

The Sub-Funds promote environmental and social characteristics in a way that meets the criteria contained in Article 8 of SFDR. Further, the management of sustainability risk forms an important part of the due diligence process implemented by the Portfolio Managers.

Plurima New Era Fund, Plurima Strategy Portfolio Fund, Plurima Mosaico Fund and Plurima Koine Thematics Fund

The environmental characteristics promoted by the Sub-Fund comprise of activities that are designed to support certain best practices linked to environmental issues, such as energy efficiency, carbon emissions and pollutants, sustainable packaging and hazardous waste.

The social characteristics promoted by the Sub-Fund comprise of activities that are designed to support better social practices, such as tackling inequality, fostering social cohesion, social integration and improving labour relations.

#### Plurima Strategy Portfolio Fund and Plurima New Era Fund

In order to promote environmental and/or social characteristics described above, the Portfolio Manager will focus on the environmental and social characteristics of the issuer. As regards investments in collective investment vehicles, the Portfolio Manager employs a thorough due diligence process, both before initial investment as well as on an ongoing basis, to assess the approach of the investment manager of the underlying scheme in integrating ESG factors into its decision-making process and the integration of ESG factors in the portfolio of the underlying funds. The Fund may also invest in passively managed schemes where the Portfolio Manager is satisfied that the ESG focus of such schemes is consistent with the ESG characteristics promoted by the Funds.

In identifying investments which allow the Sub-Funds to promote the above characteristics, the Sub-Fund assets will be screened in accordance with the Portfolio Manager's view of appropriate sustainability parameters as measured using the Portfolio Manager's proprietary environmental ("E"), social ("S") and governance ("G") scoring model (the "ESG Scoring Model").

The Portfolio Manager will positively screen companies through a comprehensive analysis process, which may include the use of specialised rating agencies and systems. The Portfolio Manager applies its proprietary scoring model to calculate an issuer's E and S combined score. If issuers have an E and S combined score below a minimum threshold they will not be considered for investment. In terms of social and environmental factors, the Portfolio Manager's proprietary ESG Scoring Model provides all analysts of the Portfolio Manager with sector specific and issuer specific information on key issues. This model helps the Portfolio Manager to identify key risks that a specific sector or issuer may be facing. The investment universe consists of all companies that issue debt securities to the capital markets and securitisations offered in the capital markets within the parameters of the UK IA Corporate Bond Sector. The issuers are assessed for good governance aspects using governance factors described in the Portfolio Manager's ESG Scoring Model.

The Portfolio Manager monitors the contribution of the investee companies to the social and/or environmental characteristics outlined above on a periodic basis by focusing on sustainability indicators such as greenhouse gas emissions per unit revenue, management remuneration, percent women on the corporate board, compliance with UN norms and exposure to controversial weapons. The Portfolio Manager will use the analysis conducted by its in-house analysts and ESG specialists, data from data providers as well as data provided by the investee companies in annual sustainability reports and through engagement directly with the investee company.

#### Plurima Mosaico Fund and Plurima Koine Thematics Fund

ESG (environmental, social and governance) factors are fully integrated into the Sub-Fund's investment process, as such factors are deemed to have a potential material impact on the valuations and financial performance of securities within the Sub-Fund's investment universe. The investment process integrates ESG factors based on proprietary and third-party research to evaluate investment risks and opportunities.

### Appendix (continued)

### 2. Sustainable Finance Disclosure Regulation and Taxonomy Disclosure (continued)

When selecting the Sub-Fund's investments, the ESG characteristics of issuers are taken into account to increase or decrease the target weight. The Portfolio Manager's assessment of each issuer under consideration for investment includes assessment against an ESG Framework Scoring System, which is proprietary to the Portfolio Manager (the "Scoring System") for discrete environmental, socio-economic and corporate governance issues. The Scoring System aims at identifying material strong or weak practices relating, among other matters to employee health and safety, labour relations, community impact, sustainability of supply chain and raw materials and other resources, sustainability of product and services, management accountability, corruption controls and regulatory compliance. The Portfolio Manager's Scoring System is based on data provided by third parties ESG assessment providers and informed by data such as company reports and extra-financial sources. Companies that fail to pass the minimum threshold specified by the Scoring System (ie in the lowest quintile of the scoring system) are excluded from selection for the Sub-Fund's portfolio. Issues identified by this ESG analysis may cause the Portfolio Manager to conduct additional analysis to understand the potential financial risks associated with an investment.

The strategy applies an additional ESG exclusion policy that prevents the Sub-Fund from implementing direct investment in companies or seeking exposure to securities of issuers and countries that are deemed incompatible with the Portfolio Manager's approach to responsible investment (ie the manufacture or production of controversial weapons, significant involvement in the production of tobacco or in the generation, extraction and/or refining of certain fossil fuels). The Portfolio Manager continually monitors and re-evaluates companies and sectors that should be considered for exclusion.

The Portfolio Manager also assesses the governance practices of issuers through the use of third party data and the Portfolio Manager's Scoring System, in order to satisfy itself that the relevant issuers follow good governance practices, in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance.

The Portfolio Manager monitors compliance with the social and/or environmental characteristics. The assessment of the ESG characteristics and sustainability risks and factors mitigating them may result in various outcomes, including the decision to overweight or underweight exposure to those securities in the Sub-Fund's portfolio, or to avoid investment in the securities. The Portfolio Manager's assessment of ESG characteristics and sustainability risks relating to an investment for the Sub-Fund may evolve as it continues to conduct fundamental research concerning that issuer, its industry or sector, and other interested entities and stakeholders.
